

**West Coast Homeopathic Society
ANNUAL CONFERENCE**

**April 27 - 29. 2019
Vancouver, BC**

Featuring

Sunil Anand

***Homeopathic Casetaking
of Adults and
Pre-verbal Children***

We are delighted to announce that **Sunil Anand** is returning to Vancouver with new cases, some of which include advanced and irreversible pathologies, metabolic disorders, and developmental disorders such as ADHD and the autism spectrum.

A leading classical homeopathic practitioner and teacher from India, Sunil Anand is recognized as an extremely accurate prescriber, especially with pediatric cases. His gentle teaching style and brilliant casetaking, analytical, and case management skills make him an internationally-acclaimed teacher. For many years, his seminars and workshops have been widely attended both in India and around the world.

This three-day seminar will expand our abilities to handle all kinds of challenging medical and pathological cases by developing the required skills to achieve more clarity and precision in understanding what needs to be healed. This is especially valuable when revealed through non-verbal communication. The result will help us to proceed confidently with prescribing and managing the case, as well as knowing how to address any acutes that crop up.

We welcome you to join us at this rare opportunity to study in Vancouver with this leading homeopath and inspirational instructor!
